LibreOffice as first step in Free and Open Source Software migration: Case of the UNESP in ODF adoption.

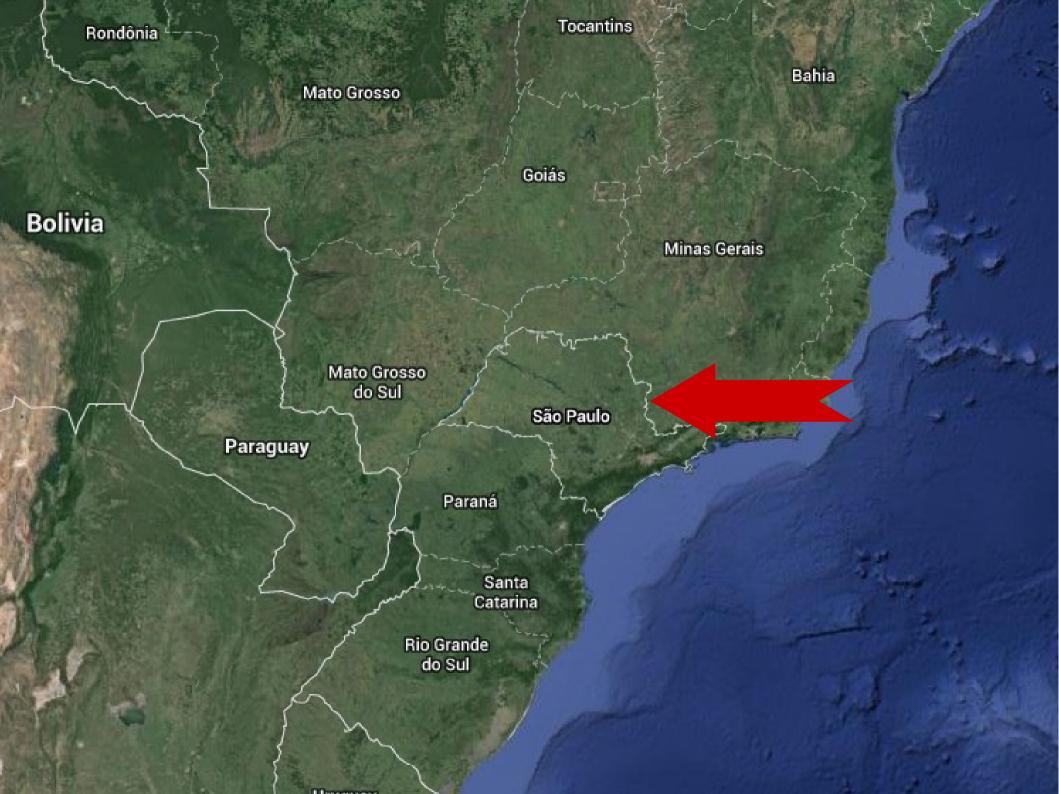

Valdir Barbosa - Douglas Vigliazzi

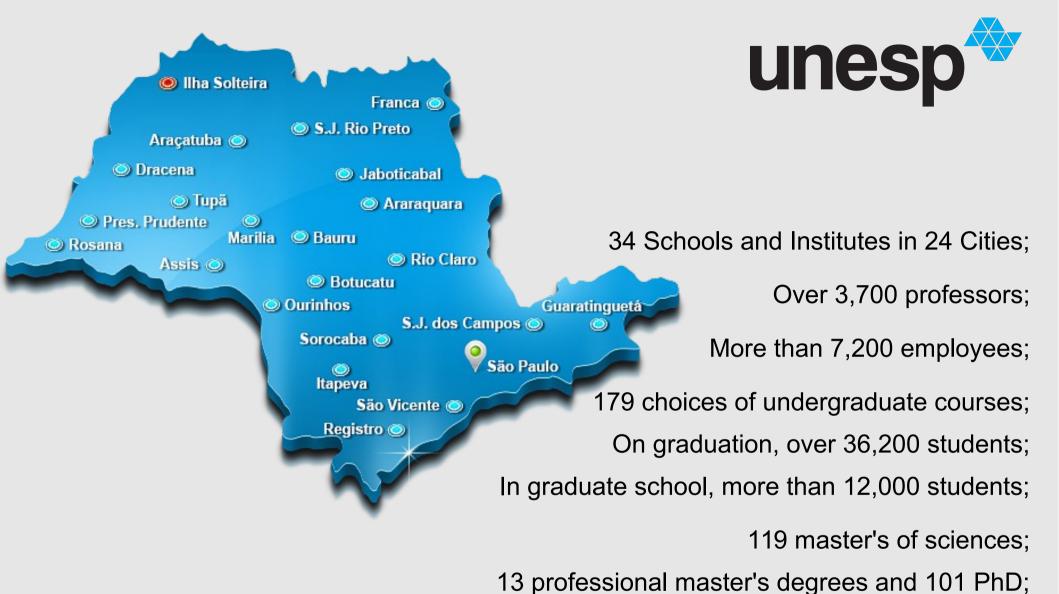

www.unesp.br

6,500 studants in lato sensu by EAD

How it all began

Institute of Arts São Paulo

With licensing issues and lack of financial resources, makes replacement from MS Office 2000 by OpenOffice on all computers.

In 2008

After 5 years using OpenOffice, in 2008 the process is reversed and are installed MS Office 2007 in all desktops.

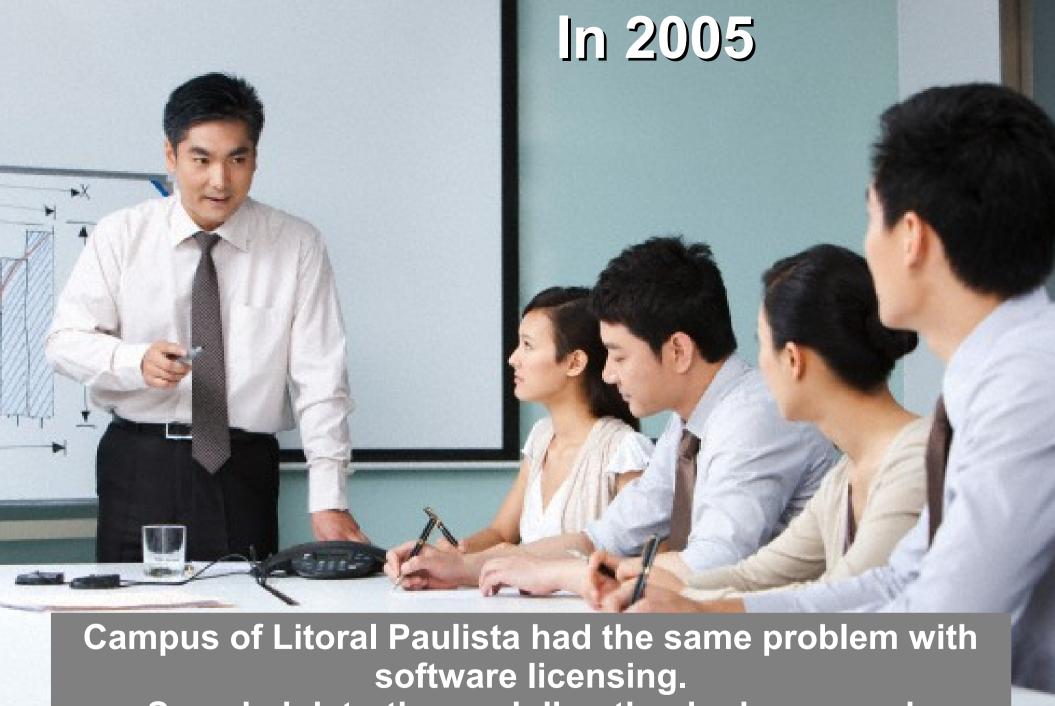

Why?

Interoperability
problems between
Institute of Arts and
University Rectory,
generating rework.

Litoral Paulista Campus

So, administration and direction had approved

BrOffice.org installation to replace MS Office 2000.

In 2007

A professor had a problem with their presentation made in PowerPoint

Why?

- →Lack documentation to support officially the migration
- →Emergency and immediate direction support
- →Lack of Free Software support policy.

College of Engineering of Ilha Solteira

August 2006, Project approval

In 2007, Dissemination

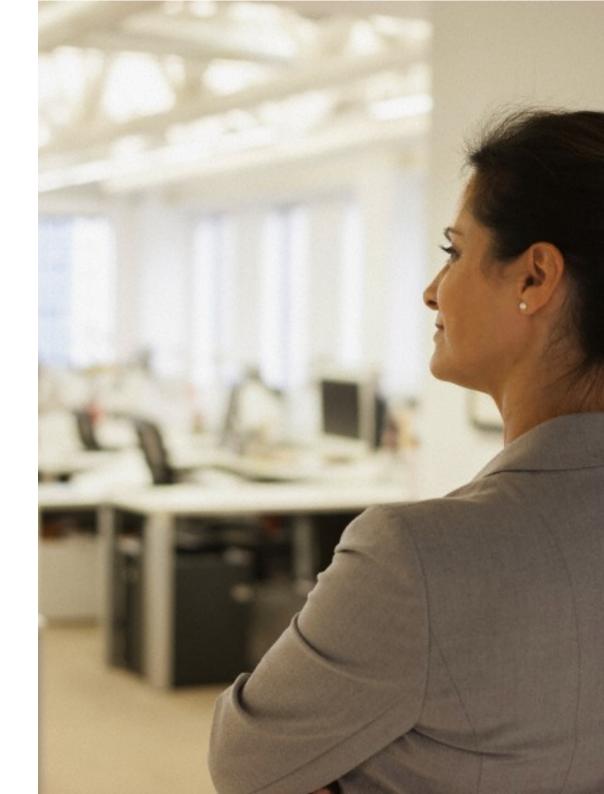

February 2007

Free software package installation

Some time later

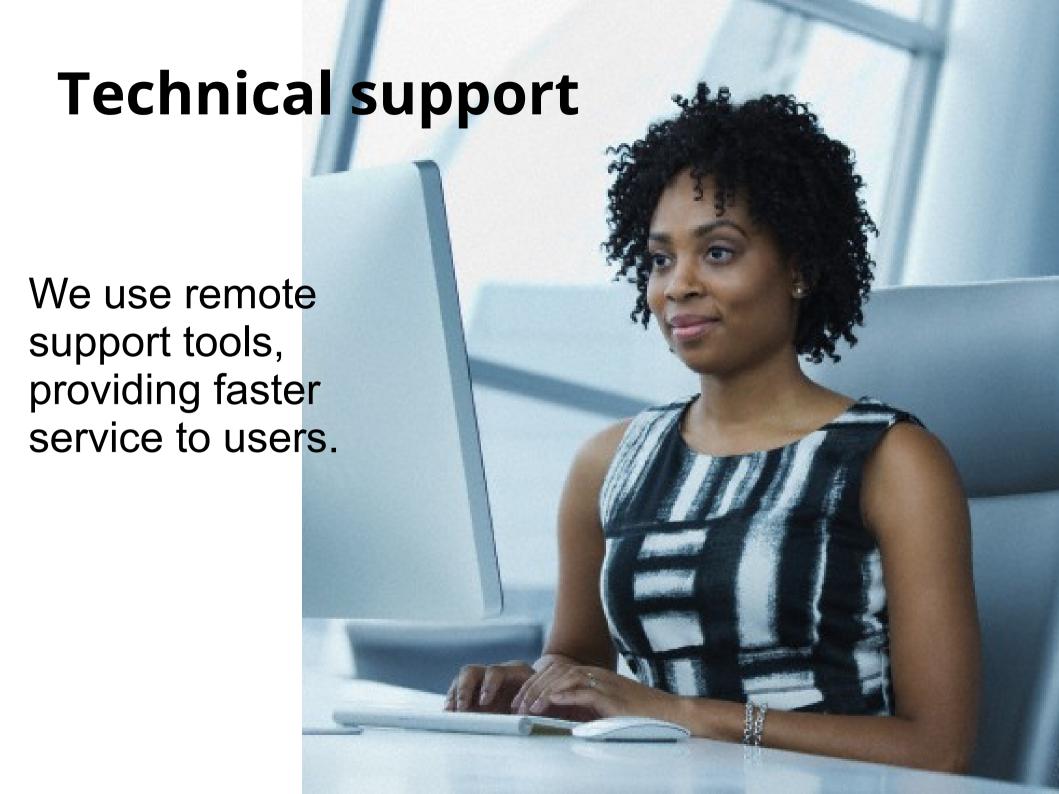

Multipliers were not multiplying knowledge with their colleagues

Training for all employees

Operating System Migration

In 2010, evaluation √ 70% satisfied 20% dissatisfied ✓ 10% go back to Windows

Some conclusions

What was the reason for 30% of employees are dissatisfied?

Training for everyone

Finally a successful experience

INSTITUTIONAL DEVELOPMENT PLAN (PDI)

Institutional Development Plan

Migration project to Free and Open Source Software

"Prioritize the use of Free and Open Source Software"

Main Strategies

- Official Sponsoship of Administration
- Dissemination about migration
- Training in FOSS Tools
- Define an ID
- •LibreOffice installation in all PC's of the University, around 45,000, to turn ODF exchange easiest
- Use of PDF in the exchange when isn't required editing
- •Definition of a strategic migration plan for ODF in the Rectory

ano 2 - setembro 2011
