

Collabora Productivity

Taking LibreOffice to the Cloud

Introducing Collabora CloudSuite

By Sam Tuke

Marketing Manager at Collabora Productivity

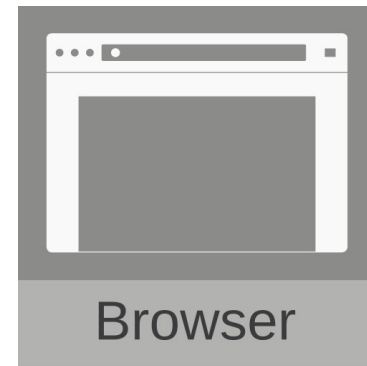

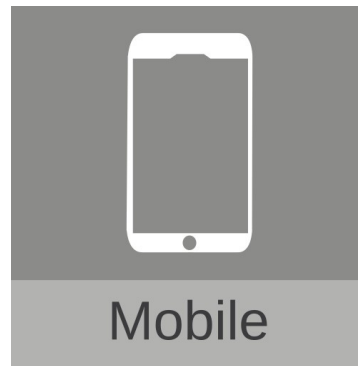

@samtuke +samtuke

Collabora CloudSuite

The new all-platform office suite

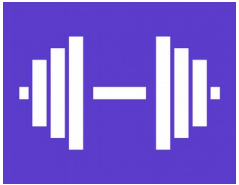

- Open Source
- Always available
- Built for enterprise

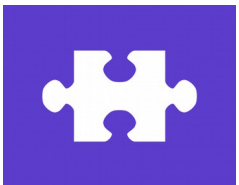

Collabora CloudSuite: Introducing Flexibility

Run private, hybrid, or hosted clouds

Advanced features across clients

Supports full fidelity LibreOffice formats

Collabora CloudSuite: Working Collaboratively

- 100% contributed to LibreOffice Online
- Clients share common codebase
- Tiled editing commissioned by TDF
 - Implemented by Collabora
 - Built on our Android Viewer
 - More viewers / editors in development

[Product video walkthrough and commentary]

Collabora CloudSuite: Tailored Clients

- Simplicity: no “phone switchboards”
- Not every feature on every client
- The **right** features in the **right** context
- User experience polishing
- We do documents, not groupware

Collabora CloudSuite: IceWarp Integration

- Built in to IceWarp Groupware
 - Mail Server
 - Document Management
 - Calendaring
- Off the shelf
- All-in-one enterprise solution

IceWarp[®]

Collabora CloudSuite: New Frontiers

- Collaborative editing work in progress
- Integration with third party systems
- Growing ecosystem
- Streamlining client communication

Collabora CloudSuite: New Frontiers

- More powerful than Google Docs
- More flexible than Office 365
- Common codebase, extraordinary experience
- **Sign up for demos and announcements**

Collabora Productivity

Thank you!
