...we run into some issues (color names, exact values)

And rebuild the palette based on mathematical models

Standard color palette with v6.1

New colors imply follow-up changes such as for gradients that were not too nice in the past

prior 6.1 color gradients (left) vs. post 6.1 (right)

Draw Styles 1/2

Competitors present some fancy options while we had only a few rather text-oriented styles

Draw Styles 2/2

New draw styles in 6.1 (left) and upcoming textual additions in 6.2 (right)

New icon themes Karasa Jaga and Colibre added

HiContrast, Industrial, and Oxygen removed

Standard toolbar with Colibre icons

App icons were refurbished and colored properly

Much work was done for the Notebookbars in particular the tabbed variants

- List styles added
- New "spell out" chapter numbering styles
- Customization of "Value Highlighting" in Calc

- Distracting tooltips in tables ("Adjust table column/row", "Select whole table/row/col") removed
- Function to modify tables within 3 seconds removed, freeing the hard-coded Alt+Delete and Alt+Insert shortcuts
- Inline tooltips on tracked changes are optional now (Tools > Options > Writer > View) and not shown when View > Track Changes is off

Kudos to all members of the design/UX team
