LibreUmbria documenti liberi, aperti e condivisi a migration romance

LibreOffice Conference Milano, Sept. 25-27 2013

> Stefano Paggetti Andrea Castellani Alfredo Parisi

LibreUmbria is a regional initiative to widely adopt LibreOffice productivity suite on regional and local government, schools and authorities in the Umbria Region.

The project is financed by Umbria Region, supervised by Open Source Competence Center of Umbria Region (CCOS) and managed by Consorzio SIR Umbria (the Consortium of Local Authorities for development of innovation and Regional Information System), with the collaboration of The Document Foundation.

The pilot phase involved, Umbria Region, SIR, Local Health Authority of Perugia (ASL1), the two Provinces of Perugia and Terni, the School of Public Administration "Villa Umbra".

Suitable methodology to reuse migration path

Share hilights and best practices

"Marketing" campaigns dedicated to internal users

Press campaigns to spread key principles of LO migration project and its importance to PA, Citizens and SME.

Training plans dedicated to different users

From technology to people, for people

LibreUmbria is not a case study or a best practice, is only a love story

Methodology or migration path?

5 working areas

- **Team:** all the people involved
- Task: planning & schedule
- Tell: communicate LO and tell a good story
- Train: learn LO and what it can do for you
- Tool: why LO

TEAM

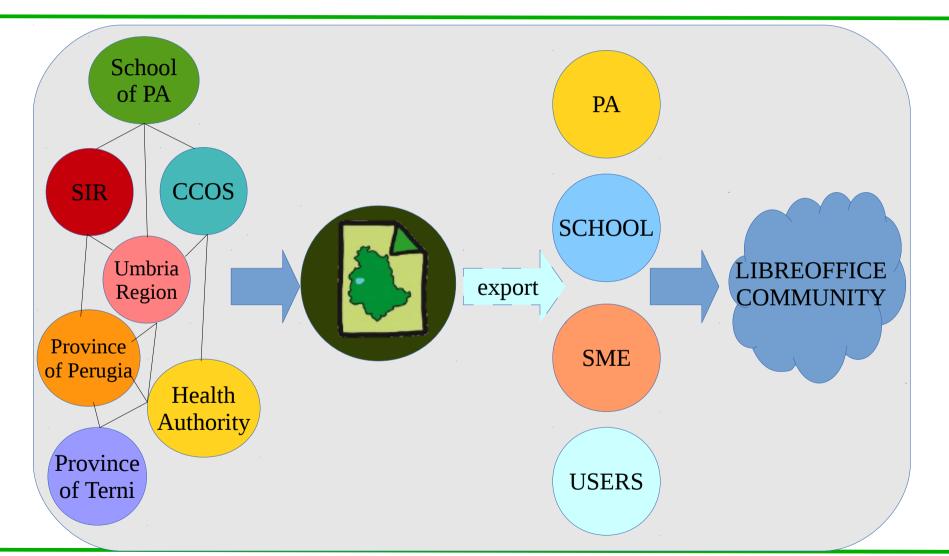

- Designers
- Communicators
- Trainers
- System Support
- Key Users (power users)
- Users

Move from a Team concept (only involvement of "active role" people) to a Community concept where everybody is encouraged to do something for somebody.

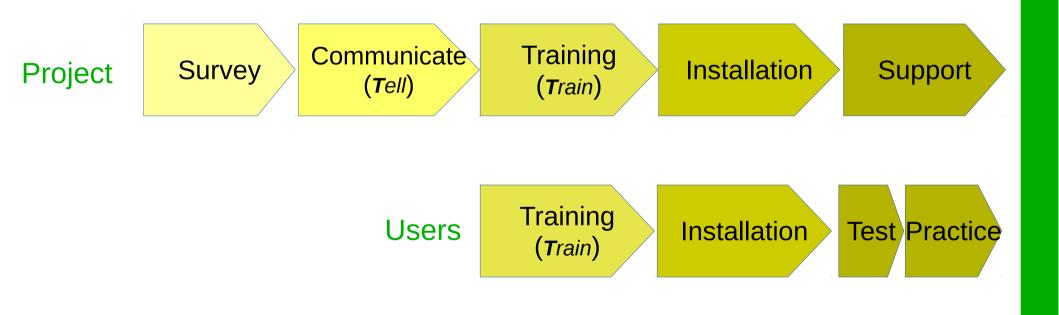

Becoming community: the most ambitious purpose of the project

TASK

Consider different point of view: Project needs vs Users expectations

TELL

TOOL

Why LibreOffice?

- Open (art. 68 CAD, L.R. 11/2006)
- Community based Support
- TDF endorsement and partnership
- Interoperability
- Ease of implementation

TOOL

Extensions implemented/tested:

- Custom Macro to digitally sign (Province of Perugia)
- Extension to digitally sign (FirmaConDiKe)
- CMIS "light" (http://redpill-linpro.com/)

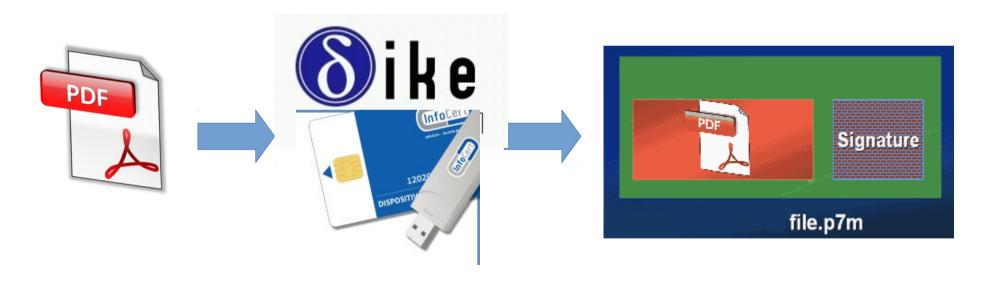

Future projects:

- Document Registry integration
- CMIS "extended"
- Send PEC (Certified E-Mail)

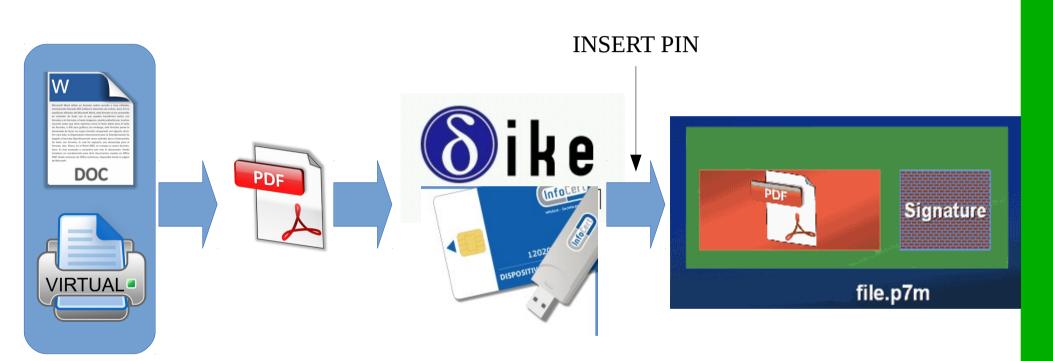

FirmaconDike

DiKe is a tool to digitally sign, timestamp and verify a document. It is commonly used in most of Italy's PA, and it is copyrighted and distributed by Infocert SpA, the software house owned by the Italian Chambers of Commerce Association.

Comments and suggestions

Moving to LibreOffice is a training issue and not a change management process because it doesn't affect any organizational process.

Comments and suggestions

No ideas to write? No problems in choosing pen
